

*Cotton-like*<sup>™</sup>

## BEYOND COTTON

**Cotton-like**<sup>™</sup> technology simulates the natural look and feel of spun yarns with the performance benefits associated with polyester, such as easy care, low shrinkage and superior color retention. These yarns produce a soft, lofty hand that feels natural, like cotton.

*Cotton-like*<sup>™</sup>

**NATURAL TOUCH**

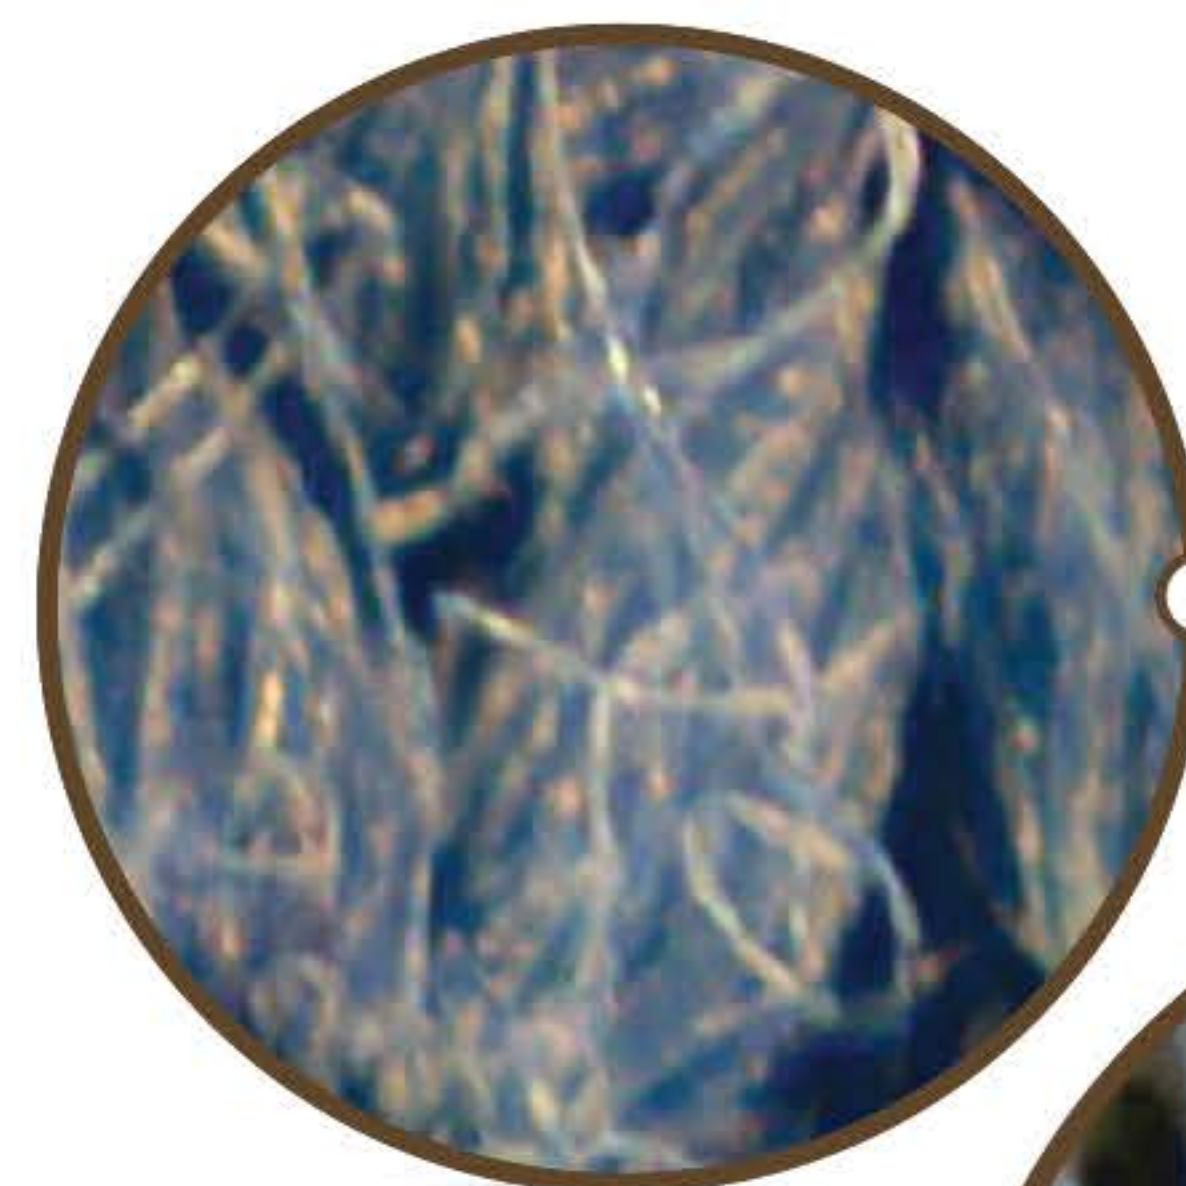

## POTENTIAL BENEFITS:

- Soft, lofty hand
- Easy care & ready to wear
- Easier dye uptake than cotton with superior color retention
- Yarns dry more quickly than natural fibers, which saves energy
- Less processing needed, such as fabric brushing or sanding
- Higher elongation, low shrinkage values and less fading
- Solid dyed fabric can have a rich, subtle heather look
- Combines well with other performance technologies

Performance benefits and claims are based on fabric construction.

## AVAILABLE:

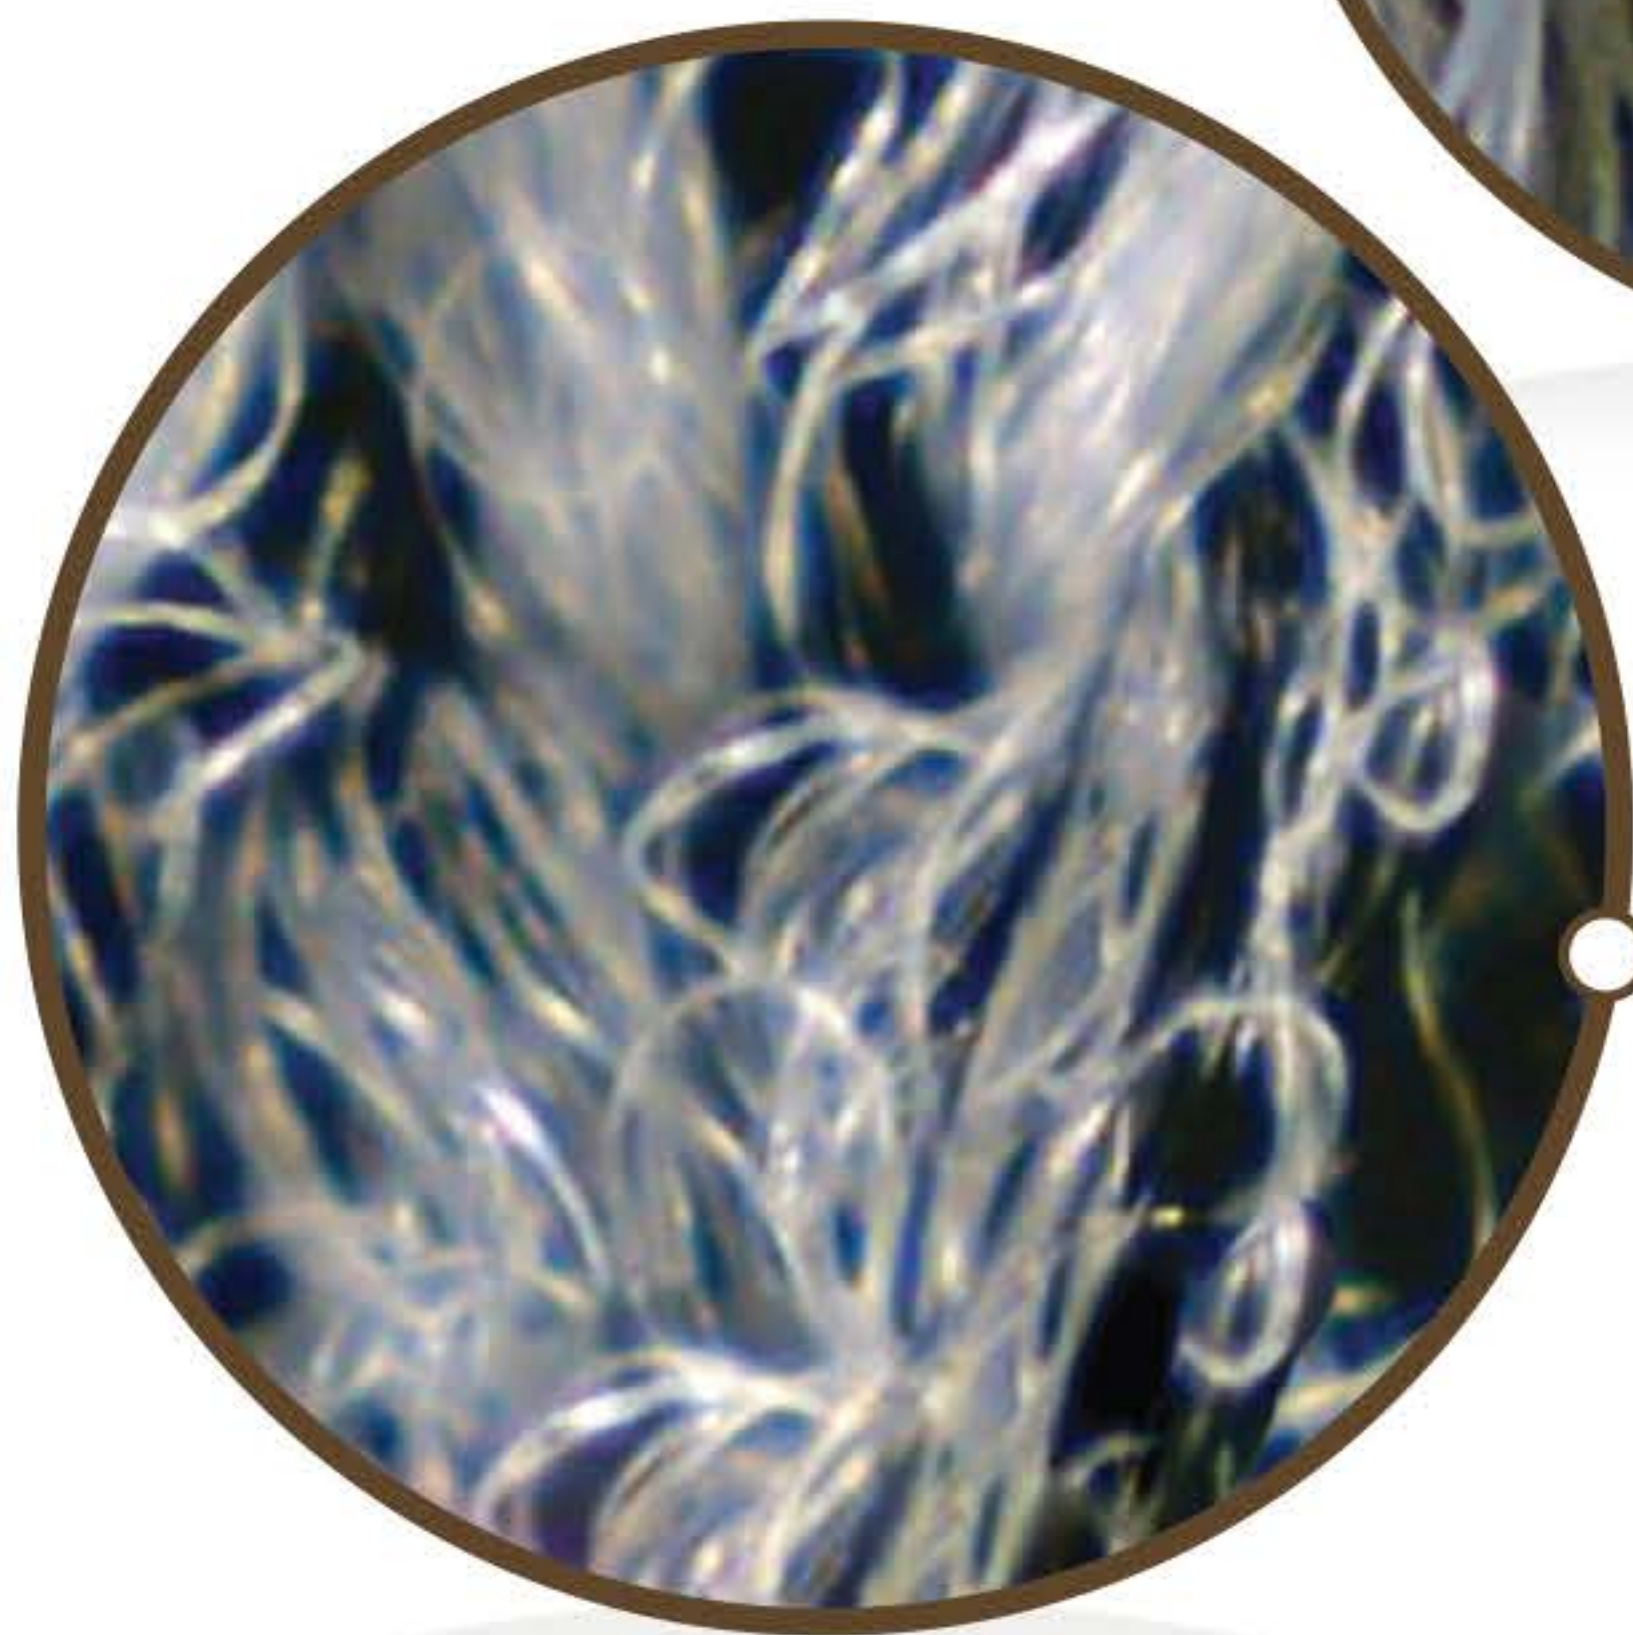

- Available in a full range of yarns including:
  - **REPREVE®**
  - solution dyed
  - cationic/disperse effects
  - matte luster yarns
  - with Spandex
- Denier ranges: 95 to 600
- Available globally. Produced in the U.S., Brazil, and China
