

RESIST₂O

MINIMIZES ABSORPTION

Resist₂O™ is an inherent water resistant technology that minimizes water absorption and leaves fabric dry at shake off. When saturated with water, fabric can dry faster than standard polyester.

RESIST₂O™

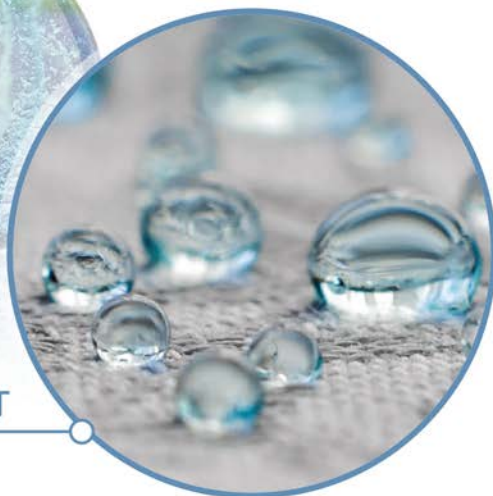

WATER RESISTANT

POTENTIAL BENEFITS:

- Minimizes water absorption
- Inherent to the yarn
- Fast drying at shake off
- PFOA- Free* C6 Technology
- Combines well with other performance technologies
- Available as Fluorine-Free
**PFOA-free is defined as below 5 ppb.*

AVAILABLE:

- Available in a full range of **REPREVE®** yarns and natural or package dyed yarns
- Available globally. Produced in the U.S.

WATER RESISTANT

END USES:

Apparel

Footwear

Furnishings

Industrial

Outdoors

Socks/Hosiery

RESIST₂O™ is a registered mark of Unifi, Inc. and is registered with the U.S. Patent and Trademark Office and with others
