

waterwise™

GREENER COLORS

Waterwise™ color technology with **REPREVE®** is a solution dyed, uniquely colored yarn where the dye becomes part of the fiber during the extrusion process. No dye bath is needed and less water is wasted, helping to conserve water and energy.

waterwise™

COLORED YARNS

POTENTIAL BENEFITS:

- Uses fewer natural resources
- Helps conserve water and energy
- Richly-colored
- Inherently colorfast, durable, bleach-resistant & UV lightfast
- Superior brilliant color uniformity
- Precise custom mixing provides enhanced capability to match colors
- Many pigments from naturally occurring or organic materials
- Combines well with other performance technologies

AVAILABLE:

- In a full range of **REPREVE®** yarns, including heather combinations and Nylon 6 variants
- Small lot availability with the potential for custom colors, minimum lbs. apply
- Open to global production conversation, given appropriate program opportunity
- Available globally. Produced in the U.S.

END USES:

Accessories

Apparel

Automotive

Footwear

Flooring

Furnishings

Industrial

Outdoors

Socks/Hosiery

DISCLAIMER: Process comparison is for making REPREVE® post-consumer polyester filament fibers. Process comparison represents the piece dyeing process versus the WATERWISE™ (solution dye) process
